

# Below-Deck Technology with Moeller's Above-&-Beyond Innovation

Unlike aluminum tanks, this comprehensive line of cross-linked polyethylene models is a distinctive Moeller innovation: featuring corrosion/pit resistance and exclusive Moeller Tite™ pioneering. Each tank is complete with Hose Tite™, machined aluminum fill spouts, withdraw, and vent fittings molded directly into the shell.

Our tanks are your single source for the ultimate in below-deck technology.

- Utilizes rotationally molded, cross-linked polyethylene plastic, allowing for complex shape designs beyond conventional and restricted aluminum tanks.
- Our fittings hold the highest O.D. and I.D. tolerances in the industry, ensuring you the highest level of input flow available during tank refueling.
- Machined aluminum 3/8" withdraw fitting has 360° rotational capability for hook-up convenience.
- Ideally suited for gasoline and diesel use with appropriate return kit (Part No. 035724-10).
  - Helping you properly secure your tank, convenient hold down grooves molded directly into tank shell work great with Moeller's Permanent Fuel Tank Hold Down Kit (Part No. 035710).
  - Conforms to all ABYC, NMMA and U.S. Coast Guard regulations.
  - Available with CE certification.
